

# “Mistakes are Building Blocks to Success,”

**R A GOTUR**

*Director - India Operations,  
Hongfa Electro acoustic Co., Ltd*

He believes in....

**Learning With Masters**

He says....

**Self Belief and Focus are the Keys to way forward**

**W**e all want to get somewhere in life and in business. We have goals and dreams. But why is it that only some people are able to get there? Is it because of luck, circumstance, or talent? Depending on the person it could be a combination of these elements.

Successful people know what they want, they know which way they are heading, they know what they need to do and are flexible about overcoming obstacles and barriers to move towards their goal, their dream.

A person with great dreams can achieve great things. Frankly speaking, it's all about believing in yourself and having clarity of vision. Once you have that, you will know how to work towards making your dreams come true. Then you also need team effort that buys into your vision and makes it their own.

I drew my strength from the aspirations of thousands of talented industrialists & professionals in every nook & corner of our country, who hope that someday they will represent India on the international stage like **Shri Navneet Kapoor** of MD of Luminous, **Mr. Ranjit Singh**, Director of SGS Techniks Pvt Ltd & **Mr. Javed Ahmed**, Country Manager of Schneider Electric, India & many more.

It is also for you to learn from your mistakes and not take setbacks to your heart. The quicker you can

deal with setback, the quicker you are ready for success. Treat them as building blocks to success. Optimism and a positive outlook also help to a great extent. NO MATTERS WHAT CRITICS SAY, finally belief in oneself is the key to success in life.

### **Developing Skills**

Clear vision and single minded focus to achieve, come what may, is critical to achieving the right outcome. Facing problems head on and converting them into opportunities is also Important. Everyone works under different constraints everyday but it is all about soaking up the pressure. One must have the patience & the perseverance to trudge on, even in the face of obstacles. This separates the wheat from the chaff.

### **Working Under Pressure**

I have always maintained. When you undertake any project be it in work, business or life, you need to execute it to the best of your capacity and abilities and set new bench marks. Life is all about action and taking risks. Striving for excellence makes one persevere tirelessly.

ALSO EVERY MISTAKES IS A LESSON LEARNT & EVERY EXPERIENCE IS PRICELESS.

**At work**, motivation of subordinates is one of the powerful tool to reach the destination. One should shape their vision like cutting a brilliant diamond from an un cut one.

Finally , I can say experience is the key that helps you to take judicious and well balanced decisions.■
